

Welcome to the Photo Booth!

Here we'll showcase your work amongst some random objects!
Things to remember while setting up your shot:

- *What would be the best way to show off your objects size?*
- *How can you show your object in perspective? (see examples)*
- *Think carefully about the objects you choose to use in your shot.*
- *How many different ways can you "fool" people about scale and porportion by placing objects around your object?*

Lets Get Started

1. Step one Place your work in the photo area
2. Step two Place some objects around your work
3. Step three Set up your shot! Look thru the camera
4. Step four Click!
5. Step five Collect your items for the next person

HOW WILL YOU SET UP YOUR SHOT? HOW WILL USE PERSPECTIVE?
